Professional Summary

Computer Science Engineering student focused on software engineering, web development, and problem solving. Skilled in developing responsive websites, UI/UX design, and building interactive user experiences using modern development tools.

Education

Malnad College of Engineering 2023 – 2027
Bachelor of Engineering in Computer Science and Engineering
CGPA: 8.94

Masters PU College 2021 – 2023
PCMB
Percentage: 93.5%

Technical Skills

Programming	C, Python, Java
Web Development	HTML, CSS, JavaScript
Tools & Platforms	VS Code, Figma, Excel, Power BI
Design Tools	Photoshop, Adobe Dimension, Canva, CapCut

Projects

1.Campus Compass - Figma UI/UX Project

- Designed a mobile app UI in Figma for a social discovery platform with floating profile bubbles and clean navigation screens.
- Built an interactive prototype using reusable components and click-based navigation to simulate profile discovery and conversations.

2.MediMind

- Developed and deployed a full-stack application to predict diseases based on user-input symptoms.
- Built REST APIs for backend processing and database interaction.
- Designed PostgreSQL database for efficient disease-symptom mapping.
- Created responsive React frontend for dynamic user interaction.
- Live: medimind-1-ejio.onrender.com

3.Personal Portfolio Website

- Developed a responsive portfolio website using HTML, CSS, and JavaScript to showcase projects and technical skills.
- Implemented interactive UI components and optimized layouts for mobile and desktop responsiveness.

4.Rad-Intel - Pneumonia Radiography Analysis System

- Developed a research-oriented web application for binary pneumonia classification from paediatric chest X-ray images using DenseNet121 and Swin Transformer feature fusion.
- Integrated Grad-CAM and LIME visual explanations to present the regions that influenced the model prediction.
- Built an evidence-constrained summarization workflow that converts recorded model outputs into structured, research-use summaries with validation and fallback handling.
- Designed an interactive interface with radiograph analysis, educational lung-health Q&A, clinician feedback, model comparison, and limitation reporting features.

Internships

Full Stack Web Development Intern – Webstack Academy (WSA) Dec 2025 – Jan 2026

- Completed a 8-week online internship focused on Full Stack Web Development using the MERN stack.
- Gained hands-on exposure to foundational web technologies including HTML, CSS, JavaScript, and React.
- Worked on SDLC-based project development using MERN stack concepts and modern web development practices.

Leadership & Activities

President – Science Association, Malnad College of Engineering 2026 – 2027

- Lead the Science Association in planning and executing technical, academic, and student engagement activities.
- Coordinate with faculty, student volunteers, and organizing teams to manage club operations and events.
- Oversee event planning, promotions, team management, and strategic initiatives aimed at increasing student participation.

Digital Team Member – Science Association, Malnad College of Engineering 2024 – 2026

- Designed 20+ digital posters, banners, and promotional creatives for technical events, project showcases, Historic figures in the field of Science and Infographics.
- Created visual content using Adobe Photoshop and Figma while maintaining branding consistency across club communications.
- Collaborated with event organizers to develop marketing materials for science and technology initiatives.
